Find Your Perfect Size

Choose the ideal ring size for yourself or someone special with our ring size guide. Follow our instructions to measure your finger or a ring you already own and find the perfect fit.

How to Measure Your Ring Size

Method 1: Measure an existing ring - the most reliable method

1. Place the ring over the circles on the chart until its inner edge fits perfectly within one of them.

If in doubt, choose the larger size.

2. Refer to our size chart where you'll find ring sizes and their inner diameters in millimeters.

3. The measuring area corresponds exactly to the ring's inner diameter.

4. Find the closest match in the chart.

Method 2: Measure your finger

1. Use a flexible measuring tape or a string.

2. Wrap it around the finger where the ring will be worn, making sure to measure the exact spot.

If stacking multiple rings, consider their placement.

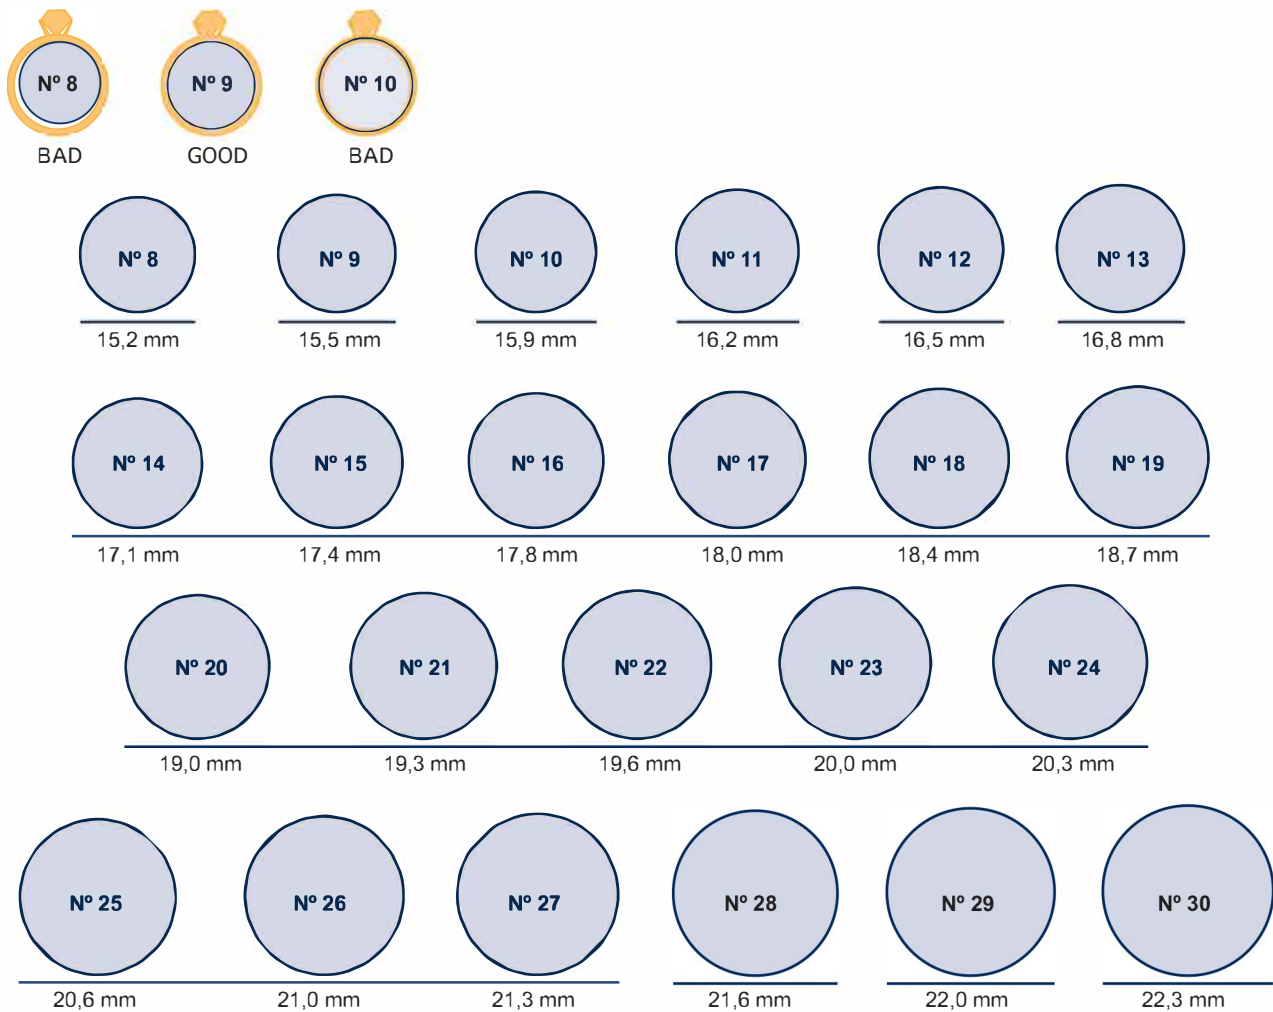

3. If using a string, mark the point where the ends meet and place it flat.

4. Measure the length in millimeters with a ruler and compare it to our size chart.

5. If you're between two sizes, choose the larger one for a more comfortable fit.
